

AgFiniti® Essentials

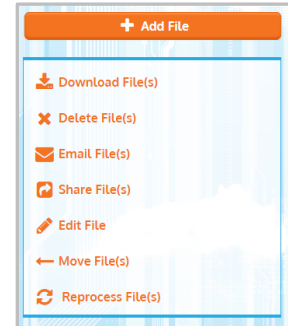

AgFiniti Essentials License has many tools and features that are beneficial to your operation. Below is a brief description of this license.

- **Wireless File Transfer**
 - AGDATA and AGSETUP transfer between supported displays, **AgFiniti** products, and **SMS™ Basic/Advanced**.
 - **SmartReport™** and **ISOXML** files can be exported by supported displays to **AgFiniti Cloud**.
 - **Shapefiles** can be transferred from **AgFiniti Cloud** to **Ag Leader® InCommand™** displays.
 - Sharing relationships allow these to be automatically shared to multiple accounts.
- **Cloud Processing**
 - Any AGDATA files present on the **My Files** page in **AgFiniti Cloud** will automatically be processed and viewable on the **Map View** page on any iOS®, Android™, or Windows® internet connected device. No need for desktop mapping software, such as **SMS**.
 - Each **AgFiniti Essentials License** provides 5,000 acres.
 - AGDATA files on the **Shared Files** page need to be copied to the **My Files** page before they will be processed.
 - AGDATA files can be transferred wirelessly from supported displays or they can be manually uploaded to **AgFiniti Cloud**.
- **Cloud Sync**
 - Provides a connection between **AgFiniti Cloud** and the **AgFiniti Mobile** app.
 - Maps and AGDATA files will stay in sync in both locations, granting you freedom to take your data wherever you wish.
- **Summary Reports**
 - Provide quick and easy access to data summaries for data present in **AgFiniti Cloud**.
- **Display and Device Location**
 - Shows the location of displays and devices currently logged into the account.
 - An icon will show the location and details about the display/device.
- **DisplayCast™**
 - Allows real time data to be transferred to one or more **InCommand** displays. Requires display unlock. See www.agleader.com for more information.

Tools and Device Management

Use the **File Transfer** option under the **Tools** menu to **Add, Download, Delete, Email, Share, Edit, Move, and Reprocess**

Note: **Reprocess File(s)** can be used to reprocess maps that have been deleted.

Sharing Options in AgFiniti Cloud

AgFiniti allows you to share files 3 different ways:

- **Email:** Share files with anyone via a download link
- **Individual File Sharing:** Share a file(s) with another AgFiniti user for a selected amount of time
- **Account Sharing:** Shares ALL files in an account to another AgFiniti account for a selected amount of time

Device Management

If needed, you can clear devices that are using the **Essentials License** from AgFiniti. To do this, go to **Manage/Resources/Devices**.

Each AgFiniti Essentials License allows for up to 3 displays and 10 iPads® to be actively connected to an account.

Transfer Files using SMS Desktop Software

1. Enter your **SMS** or **AgFiniti** username and password under **Tools/General Options/AgFiniti**
2. Import files from AgFiniti using the **Read Files** tool
 - a. **Select the files** to read into SMS and begin processing
 - b. Filtering options are provided in SMS that will allow you to sort files, such as the ones currently being shared, into the project you are currently using

3. Export data from SMS to AgFiniti using **Device Setup Utility**

- **Export AgData** files containing field names, boundaries, prescriptions, etc. for field operations and/or mappable data (harvest maps, soil sampling points, soil type maps, etc.) to be viewed in **AgFiniti Mobile** and **AgFiniti Cloud**.
- **SMS** has the ability to send data to your own account or directly to other **AgFiniti** users (requires **Essentials License**).

Device Setup

For questions:

- Login to your **AgFiniti** account at www.agfiniti.com and navigate to the **Support/Help** menu for further information
Or
- Contact our dedicated Software Support Team at **515-735-7000 ext. 1**, email support@agleader.com or visit sms.agleader.com
