* Quantities listed are per row unit

The Row Control Module installation must meet the following requirements:

- Two point minimum mechanical attachment of RCM bracket to row unit
- Secure attachment of RCM to the RCM bracket
- RCM and bracket do not interfere with motion of row unit
- RCM and bracket do not interfere with placement or performance of seed meter
- Cables connected to RCM are not at risk of damage
- RCM connectors are positioned to avoid water pooling within the connector
# Installation Procedure

Photos are for reference only, and may not match your row unit setup.

1. Find a section of the row unit that would provide adequate space for RCM and bracket.

2. Securely attach RCM bracket to row unit using provided hardware or other means.

3. Attach RCM to bracket using provided hardware.

4. Position RCM to avoid water pooling within the connectors.
