

Distribution Dealers selling ParaDyme steering systems and ParaDyme installation kits listed in Table 1.

Overview SA Module - Wheeled PN: 200-0206-01 Software upgrade version 1.11.6 is released to replace versions 1.11.0 and 1.11.2. It is recommended that this upgrade be installed for vehicle kits listed in Table 1.

Changes included in this upgrade:

1. Support for Hagie STS 2012 model year Steer Ready machines.
2. Changes valve coils logic so when ParaDyme system is disengaged valve coils are grounded to prevent unintentional wheel movement. This affects Compact Valve installations and most CNH AccuGuide and IntelliSteer Ready vehicles.
3. John Deere ATR manual override improvements.

NOTE: Do NOT upgrade a John Deere Track SA Module (200-0207-01) or a John Deere Combine 2010 or newer SA Module (200-0206-03) with this software, doing so will cause the SA Module to not work and will required to be sent back to Ag Leader for repair.

- Requirements**
- A computer with a 9 pin serial port as well as the necessary Windows operating systems called for in the SA Module Firmware Upload User manual
 - SA Module Programming cable PN:201-0350-01
 - SA Module Upload –v1.11.6.exe file from the Ag Leader dealer web site. This self-extracting file contains:
 1. SAM Firmware Upload Tool software application
 2. V 1.11.6 firmware payload file: **samwh111_6.msc**
 3. SA Module Firmware Upload User manual rev C.pdf
